

QUALITY AND SECURITY POLICY

Quality

We believe in empowering our employees with relevant training and coaching to ensure excellent performance in all our activities, and by that provide consistent products and services that meet customer and regulatory requirements.

This will be achieved through:

- Our Training Program: ensuring that all our employees on- or offshore gets the necessary training they need to perform their quality work
- Documented work processes: to ensure efficient and safe operations with our risk based approach
- Motivating leadership: by cultivating visible leaders that include and provide their teams with the empowerment and tools to achieve success
- Continued improvement and development: through feedback from employees and customers, and experience transfer from our operations

Security

We shall always keep a high security level to safeguard employees, company, and assets.

Cyber Security

We will use a risk-based approach to identify the necessary protection levels based on the evaluated business risk. This to safeguard against accidental or unlawful destruction, loss, alteration, or unauthorized disclosure or access to data.
