

ENVIRONMENTAL AND ENERGY POLICY

Island Drilling Company AS is committed to minimizing our environmental footprint and enhancing energy performance. This policy outlines our dedication to ISO 14001 and ISO 50001 standards, promoting environmental sustainability and energy efficiency across all our operations.

COMMITMENT TOWARDS THE ENVIRONMENT

At Island Drilling Company AS, we are deeply committed to integrating environmental and energy sustainability into our operations. Our dedication is reflected through the following key actions:

- **Reducing Environmental Impacts and Risks:** We proactively minimize our environmental footprint across all activities.
- **Contained Rig System:** We utilize a Contained Rig System to manage and control all discharges, to prevent spill to sea.
- **Waste Reduction and Pollution Prevention:** Our Green Team, guided by ISO 14001 standards, leads initiatives to reduce waste and prevent pollution, fostering an environmentally aware culture.
- **Energy Efficiency Practices:** We implement energy-efficient technologies and practices to enhance our operational performance and reduce consumption.
- **Energy Monitoring and Target Setting:** We continuously monitor our energy use and set performance targets to drive improvements.
- **Sustainable Practices:** Our Energy Team, in line with ISO 50001 standards, identifies and promotes sustainable practices to enhance energy efficiency and reduce our overall consumption.
- **Continuous Improvement:** Both our Green and Energy Teams work diligently to ensure compliance with relevant regulations and foster a culture of continuous environmental and energy performance improvement.

By embedding these principles into our daily operations, we aim to create a sustainable future and make a positive impact on the environment.
